Subject: RE: Crop Agriculture + AMR Fungi Workshop: Provisional Committee Meeting #2

Dear all,

Please see attached for the most recent revised agenda (version 4.1). Note that we added some internal notes in italics next to some of the sessions, and marked suggested speaker names in blue. We have also been keeping track of suggested speakers that come in through emails, and can start adding them into the agenda more as the sessions topics and goals solidify.

Two things that may be important for reviewing the agenda and going into the next week seem to be: (1) remembering to keep an international perspective as the current sessions have a strong US focus, and (2) how might topics currently covered in Day 1 and Day 2 fit into the larger AMR strategies such as WHO's GLASS initiative?

There was also interest in having a few invited speakers to join some committee meetings and help inform the planning: Kiersten Wise (Marin could reach out), someone from the Composting Council of the US and/or the ornamental bulb industry (Julius could suggest), and I know there was a third suggestion from Sally in the Zoom chat but turns out I didn't catch it and don't have access to the chat log right now. **Please feel free to reach out to gauge their interest and availability in joining on Mondays at 12 noon Eastern time.** I can work with Sally and Tom to figure out the schedule and determine the potential dates so we can plan the meetings ahead of time.

Brief meeting summary: Today's discussion was mainly around Day 2, particularly on disease management in plants and surveillance for fungicide use and resistant fungi on plants and in the environment. We also touched on the poster session and morning networking hour on Day 3. Most of the committee members in favor of holding the poster session (with option of presenting virtual posters as well). We could try to foster the morning pre-workshop time as a One Health networking between plant and human health attendees (perhaps also animal/antibiotics AMR attendees too). I am attaching minutes from today's meeting from Claire, which also contain many of the links shared in the chat.

The next meeting will likely focus on shaping Day 3. We also encourage everyone to take a half step back and think about whether there are outstanding questions that we have overlooked, what we would like the attendees to take away from the workshop and how we are meeting those desired outcome(s) right now.

Best,
Julie L

Subject: RE: Crop Agriculture + AMR Fungi Workshop: Provisional Committee Meeting #2

Dear all,

This is just a quick reminder to join the provisional committee meeting tomorrow (Wednesday, 3/30) at 1 PM EDT. Please take a moment to review the latest draft agenda, attached, and share any comments you have.

We have submitted the nominations package for this committee and are hoping to hear back on the decision soon. In the meantime, it looks like Mondays between 12-1 PM EDT works for everyone for a standing meeting. We will schedule a recurring meeting for that time. Thank you all for helping to nailing that down so quickly.

Looking forward to seeing everyone again soon!

Best,
Julie L
